framework for developing SOAP and REST web services.

~~Apache CXF Web Service Development [Book]~~

Become familiar with the different features of Apache CXF architecture and set up the CXF environment
Develop a simple web service using CXF-based Spring configuration Build a web service using contract-first and code-first approaches in simple frontend APIs such as JAX-WS Create dynamic web service clients by using various CXF frontend APIs

~~Apache CXF Web Service Development — Packt Subscription~~

Apache CXF is an open source services framework that makes web service development easy, simplified, and standard based. CXF provides many features such as frontend programming, support for different transports and data bindings, support for different protocols, and other advanced concepts like Features and Invokers.

~~Developing a Web Service with CXF — JavaBeat~~

Apache CXF is an open-source, fully featured Web services framework. It originated as the combination of two open-source projects: Celtix developed by IONA Technologies and XFire developed by a team hosted at Codehaus. These two projects were combined by people working together at the Apache Software Foundation and the new name CXF was derived by combining "Celtix" and "XFire". The CXF key design considerations include: Clean separation of front-ends, like JAX-WS, from the core code. Simplicity

~~Apache CXF — Wikipedia~~

You can develop a service using one of two approaches: Start with a WSDL contract and generate Java objects to implement the service. Start with a Java object and service enable it using annotations. For new development the preferred path is to design your services in WSDL and then generate the code to implement them.

~~Apache CXF — Developing a Service~~

Setting up your build The use of Apache Maven is recommended for your web service projects, as it will automatically bring in all necessary dependencies for your web service project. See the Maven pom.xml for this sample for the configuration needed.

~~Apache CXF — A simple JAX-WS service~~

Apache CXF™ is an open source services framework. CXF helps you build and develop services using frontend programming APIs, like JAX-WS and JAX-RS. These services can speak a variety of protocols such as SOAP, XML/HTTP, RESTful HTTP, or CORBA and work over a variety of transports such as HTTP, JMS or JBI. News November 10, 2020 - Apache CXF 3.4.1 and 3.3.8 released!
