6 Answers to the Exercises factors of n can be computed by the Euclidean algorithm (Lemma A.69). Let $W_n := \mathbb{Z}/n\mathbb{Z}$. Let \bar{W}_n be the complement of W_n . Then $|\bar{W}_n| = \phi(n)$ (see below). Hence, choosing a random $[a] \in \bar{W}_n$ we can compute the factors of n in this way
