The engine control module (ECM) is also known as the powertrain control module (PCM) or the engine control unit (ECU). The main responsibility of this controller is to get information from sensors and run certain actuators. In the case of any errors, the ECU shows a check engine light on your dashboard.

~~Engine Control Module and Sensor Locations - AxleAddict...~~

An engine control unit (ECU), also commonly called an engine control module (ECM) or powertrain control module (PCM), is a type of electronic control unit that controls a series of actuators on an internal combustion engine to ensure optimal engine performance. It does this by reading values from a multitude of sensors within the engine bay, interpreting the data using multidimensional ...
