It basically copy the URL of the victim you want to hack . Then, the online fb hacker tries to find any occurrence of this username in the Facebook's database. Once found, then online fb hacker will then try to read the encrypted password. Once read, the hardest part begins; the decryption. Facebook uses one of the best encryption technique on the internet, but thanks to a few fb developers we were able to get their encryption method and our script will, in a few minutes, decrypt the password ...
