Those who are curious to learn how
process thought might be enhanced
by dialogue with neuroscience will be
richly rewarded by the two chapters
that draw from microgenetic theory.³
According to this theory,
consciousness occurs through
succession of brief wave-like events
that originate in the primitive parts of
the brain and terminate in the
neocortex. congruent with process
phenomenology, this account
suggests that what we experience
most clearly as consciousness is

Consciousness, at its simplest, is
"sentience or awareness of internal or
external existence". Despite centuries
of analyses, definitions, explanations
and debates by philosophers and
scientists, consciousness remains
puzzling and controversial, being "at
