Why is XML used for data exchange? - Quora

From the previous chapter Introduction to XML, you have learned the need for data exchange and the usefulness of XML in data exchange. In this chapter, you have learned more about the three major XML files: the XML document, the XML schema, and the XML stylesheet. You learned the correct documentation required for each type of file.

XML - Managing Data Exchange/A single entity - Wikibooks ...

Extensible Markup Language (XML) data exchange is the process by which XML documents structured in a source document type definition (DTD) are queried under a different target DTD, given a set of transformation rules between the source DTD and target DTD.

XML data exchange: Consistency and query answering ...

So the takeaway is that you can easily use XML for data exchange where you have a defined structure of how the different entities in the data are arranged together, and can also use the XML to convert it to any other output. For ex:- XML to HTML conversion could be a very apt example of this. Hope this helps-Manan

How to exchange data in XML - Quora

Good news For every XML data exchange setting and CTQ/--query Q, th problem CertAnsw(Q) is solvable in exponential time. More precisely, it is in coNP. Not so good news Sometimes exponential time is "unavoidable": There exist an XML data exchange setting and a CTQ/--query Qsuch that CertAnsw(Q) is coNP-complete.
